Description :

PDF-a6a35 | The discrete logarithm problem based on elliptic and hyperelliptic curves has gained a lot of popularity as a cryptographic primitive. The main reason is that no subexponential algorithm for computing discrete logarithms on small genus curves is currently available, except in very special cases. Therefore curve-based cryptosystems require much smaller key sizes than RSA to attain the same security... *Handbook of Elliptic and Hyperelliptic Curve Cryptography (Discrete Mathematics and Its Applications)*
